

AWARDEE REPORT FORM

NAME	Dr Stuart Morton
UNIVERSITY	University of Southampton
NAME OF AWARD	Symington Bequest Fund
PURPOSE OF AWARD	<i>conference/event attended/organised (full name) with city and dates.</i>
	International Federation of Associations of Anatomists conference, London, August 2019
REPORT: What were your anticipated benefits?	
	<ul style="list-style-type: none"> - Networking with old colleagues and new delegates - Disseminating my latest research in collaboration with colleagues and students - Keeping abreast with the latest educational and anatomical research of others around the globe
COMMENTS: Describe your experience at the conference / lab visit / course / seminar/ event.	
	<p>Being an international anatomy conference meant that it attracted a large number of delegates within the anatomical community. This was an excellent opportunity to maintain and rekindle old relationships, as well as forge new ones. A couple of years ago at a previous AS conference, I befriended a delegate from Malta whom I wanted to keep in touch with but unfortunately had not; in August we were able to meet up again and talk about potentially collaborating on a project.</p> <p>Many of the talks were very interesting including one on disruptive and constructive innovation in anatomy, and it was also interesting to learn that a new core curriculum in histology has been worked on. There was also a talk on looking at histology in 3D which I discussed with the speakers afterwards.</p> <p>The poster presentations were also of high quality and I talked at length with a presenter who set up a graduate-entry medical degree programme.</p>

REPORT: In relation to skills, what were the most important things you gained? *(does not apply to equipment grant. For public engagement/outreach awards what did your audience gain and how did you evaluate success?)*

The presenter I spoke with regarding the setup of the medical degree is somebody I am collaborating with now to look at tweaking an early-years medical curriculum. I learnt a lot from the poster regarding blueprinting of teaching against learning outcomes, and how to present information in a much more ergonomic way on the VLE.

REPORT: How do you think you will put this learning experience into practice in the future? For public engagement/outreach awards how with the materials/knowledge generated by this activity be used in the future?

With the work I am currently involved in with the revalidation of a medical curriculum, I am utilising some of the advice and approaches used in the setup of the new graduate-entry medical degree programme aforementioned. This collaboration was achieved through meeting and discussing with a presenter of a poster at the IFAA.

Thank you AS council for this opportunity.
